

# DAILY TECHNICAL REPORT

07 February 2017

EUR / USD

**Weakening.**

- EUR/USD's selling pressures have increased. It seems that strong hourly resistance area is given around 1.0800. Hourly support lies at 1.0590 (19/01/2016 low) and 1.0341 (03/01/2017 low). Expected to see continued consolidation.
- In the longer term, the death cross late October indicated a further bearish bias. The pair has broken key support given at 1.0458 (16/03/2015 low). Key resistance holds at 1.1714 (24/08/2015 high). Expected to head towards parity.

GBP / USD

**Moving towards 1.2254.**

- GBP/USD is still trading below resistance given at 1.2771 (05/10/2016 high). The pair keeps on bouncing lower towards support given at 1.2254 (19/01/2016 low).
- The long-term technical pattern is even more negative since the Brexit vote has paved the way for further decline. Long-term support given at 1.0520 (01/03/85) represents a decent target. Long-term resistance is given at 1.5018 (24/06/2015) and would indicate a long-term reversal in the negative trend. Yet, it is very unlikely at the moment.

USD / JPY

**Monitoring support at 111.36.**

- USD/JPY is slowly pushing lower. Hourly resistance is given at 115.62 (19/01/2016 high). The technical structure suggests further downside momentum, as the break of hourly support given at 112.57 (17/01/2017 low) has confirmed bearish pressures.

- We favor a long-term bearish bias. Support is now given at 96.57 (10/08/2013 low). A gradual rise towards the major resistance at 135.15 (01/02/2002 high) seems absolutely unlikely. Expected to decline further support at 93.79 (13/06/2013 low).

USD / CHF

**The dollar strength should not last long**

- USD/CHF's momentum is definitely bearish despite ongoing increase. Key resistance is given at a distance at 1.0344 (15/12/2016 high). We believe that the road is clearly wide-open for further decline.
- In the long-term, the pair is still trading in range since 2011 despite some turmoil when the SNB unpegged the CHF. Key support can be found 0.8986 (30/01/2015 low). The technical structure favours nonetheless a long term bullish bias since the unpeg in January 2015.

**USD / CAD**

**Bouncing from support at 1.3000.**

- USD/CAD is trading higher today. The pair has largely bounced higher from support given at 1.3000 (22/09/2016 low). Hourly resistance given at 1.3169 (20/01/2017 high) has been broken. As long as resistance at 1.3353 is not broken (20/01/2017 high), there is the risk of a reversal towards support at 1.2823 (07/09/2016 low).
- In the longer term, there is a golden cross with the 50 dma crossing the 200 dma indicating further upside pressures. Strong resistance is given at 1.4690 (22/01/2016 high). Long-term support can be found at 1.2461 (16/03/2015 low).

AUD / USD

**Still consolidating.**

- AUD/USD is still consolidating as traders are likely to take their profit after the surge towards 0.7700. Hourly resistance is given at 0.7696 (02/02/2017 high). Stronger resistance can be found at 0.7835 (21/04/2016 high). Expected to see continued increase.
- In the long-term, we are waiting for further signs that the current downtrend is ending. Key supports stand at 0.6009 (31/10/2008 low). A break of the key resistance at 0.8295 (15/01/2015 high) is needed to invalidate our long-term bearish view.

EUR / CHF

**Bearish pressures are definitely strong.**

- EUR/CHF's pressures are back. Strong resistance is given at 1.0762 (27/12/2016 high). Anyway, the medium-term pattern suggests us to see continued bearish pressures towards key support that can be found at 1.0623 (24/06/2016 low).
- In the longer term, the technical structure is mixed. Resistance can be found at 1.1200 (04/02/2015 high). Yet, the ECB's QE programme is likely to cause persistent selling pressures on the euro, which should weigh on EUR/CHF. Supports can be found at 1.0184 (28/01/2015 low) and 1.0082 (27/01/2015 low).

EUR / JPY

**Breaking support at 120.55.**

- EUR/JPY's demand has faded abruptly. Strong hourly support given at 120.55 (17/01/2017 low) has been broken while resistance is given at 123.31 (27/01/2017 high). The road is wide open towards support at 118.73 (05/12/2016 low).
- In the longer term, the technical structure validates a medium-term succession of lower highs and lower lows. As a result, the resistance at 149.78 (08/12/2014 high) has likely marked the end of the rise that started in July 2012. Strong support at 94.12 (24/07/2012 low) looks nonetheless far away.

EUR / GBP

Pausing on strong resistance area.

- EUR/GBP is back to bullish. Hourly resistance is given at 0.8634 (31/01/2017 high). The road is nonetheless wide open towards support at 0.8304 (05/12/2016) if resistance at 0.8634 holds.

- In the long-term, the pair has largely recovered from recent lows in 2015. The technical structure suggests a growing upside momentum. The pair is trading above from its 200 DMA. Strong resistance can be found at 0.9500 psychological level.

**GOLD (in USD)**

**Continued bullish pressures.**

- Gold is trading above former resistance given at 1221 (22/11/2017 high) before bouncing lower while hourly support lies at 1177 (11/01/2017 low). The short-term trend is positive. Strong support is located at 1122 (15/12/2016 low).
- In the long-term, the technical structure suggests that there is a growing upside momentum. A break of 1392 (17/03/2014) is necessary to confirm it. A major support can be found at 1045 (05/02/2010 low).

SILVER (in USD)

**Continued bullish pressures.**

- Silver has finally exited an area where bearish pressures seem important. The precious metal is way into a bullish momentum. Hourly support can be located at 16.34 (06/01/2017 low) then 15.63 (20/12/2016).
- In the long-term, the death cross indicates that further downsides are very likely. Resistance is located at 25.11 (28/08/2013 high). Strong support can be found at 11.75 (20/04/2009).

Yann Quelell | Market Strategist  
e-mail: yann.quelell@swissquote.ch

**Crude Oil (in USD)**

**Stalling below resistance at 54.32.**

- Crude oil is pushing higher. Buying pressures seem more and more important. Resistance lies at 54.32 (06/01/2017 high). Yet, a correction in the near-term towards 49.61 (08/12/2016) is possible in case support at 50.71 (10/01/2017 low) is broken. The black commodity needs to push higher to confirm deeper buying pressures.
- In the long-term, crude oil has recovered after its sharp decline last year. However, we consider that further weakness are very likely. Strong support lies at 24.82 (13/11/2002) while resistance can now be found at 55.24 (03/01/2017 high).
