

DAILY TECHNICAL REPORT

11 August 2017

EUR / USD

Consolidating below 1.1800.

- EUR/USD bullish pressures are still on despite ongoing consolidation. Hourly resistance is given at 1.1910 (02/08/2017 high). Hourly support can be found at 1.1715 (08/08/2017 high). Stronger support lies at 1.1613 (26/07/2017 low). Expected to show renewed bullish pressures.
- In the longer term, the momentum is now turning largely positive. We favour a continued bullish bias. Key resistance holding at 1.1871 (24/08/2015 high) has been broken while strong support lies at 1.0341 (03/01/2017 low).

GBP / USD

Monitoring support at 1.2933.

- GBP/USD keeps on weakening. Hourly resistance is given at 1.3267 (03/08/2017 high). Hourly support is given at 1.2933 (20/07/2017 low). Expected to show further monitoring of support at 1.2933.

- The long-term technical pattern is even more negative since the Brexit vote has paved the way for further decline. Long-term support given at 1.0520 (01/03/85) represents a decent target. Long-term resistance is given at 1.5018 (24/06/2015) and would indicate a long-term reversal in the negative trend. Yet, it is very unlikely at the moment.

USD / JPY

Ready for a breaking strong support.

- USD/JPY's bearish momentum continues. The pair has failed to break resistance implied by the upper bound of the downtrend channel. The pair is heading towards 108.83 (17/04/2017 low). Expected to show further downside pressures.
- We favor a long-term bearish bias. Support is now given at 96.57 (10/08/2013 low). A gradual rise towards the major resistance at 135.15 (01/02/2002 high) seems absolutely unlikely. Expected to decline further support at 93.79 (13/06/2013 low).

USD / CHF

Weakening.

- USD/CHF is weakening after the pair failed to monitor resistance at 0.9771 (15/06/2017 high). Hourly support at 0.9631 (01/08/2017 low) has been broken. Expected to show further downside pressures towards 0.9500.

- In the long-term, the pair is still trading in range since 2011 despite some turmoil when the SNB unpegged the CHF. Key support can be found 0.8986 (30/01/2015 low). The technical structure favours nonetheless a long term bullish bias since the unpeg in January 2015.

USD / CAD

Short-term bullish momentum continues.

- USD/CAD's short-term bullish momentum continues. The road is wide open for further increase. Hourly support is given at a distance at 1.2414 (27/07/2017 low). Expected to show continued increase.
- In the longer term, the pair has broken long-term support that can be found at 1.2461 (16/03/2015 low) before bouncing back. Strong resistance is given at 1.4690 (22/01/2016 high). The pair should head further lower.

AUD / USD

Growing selling pressures.

- AUD/USD's short-term technical structure is bearish. Hourly support at 0.7875 (21/07/2017 low) has been broken. Hourly resistance is given at 0.8066 (27/07/2017 high). Expected to show continued decline.
- In the long-term, we are waiting for further signs that the current downtrend is ending. Key supports stand at 0.6009 (31/10/2008 low). A break of the key resistance at 0.8295 (15/01/2015 high) is needed to invalidate our long-term bearish view.

EUR / GBP

Consolidating below 0.9100.

- EUR/GBP is trading around its highest levels of the year despite ongoing consolidation. Hourly resistance lies at 0.9087 (08/08/2017 high). Hourly support is given at a distance at 0.8742 (16/06/2017 low). Downside risks are nonetheless important.
- In the long-term, the pair has largely recovered from recent lows in 2015. The technical structure suggests a growing upside momentum. The pair is trading above from its 200 DMA. Strong resistance can be found at 0.9500 psychological level.

EUR / CHF

Selling pressures are back.

- EUR/CHF has consolidated and short-term selling pressures are definitely back on. Hourly support is now located at 1.1260 (04/08/2017 low). Expected to show continued weakness.
- In the longer term, the technical structure has reversed. Strong resistance at 1.1200 (04/02/2015 high) has been broken. Yet, the ECB's QE programme is likely to cause persistent selling pressures on the euro, which should weigh on EUR/CHF. Supports can be found at 1.0184 (28/01/2015 low) and 1.0082 (27/01/2015 low).
