The investor is about to purchase a product that is not simple and may be difficult to understand.

1. What is this product?

Type

This product is a Swiss Uncertificated Security under Swiss law.

Term

The term of the product ends on the Redemption Date, unless the product has been terminated or redeemed early. The Issuer has the right to redeem the product early on any Early Redemption Observation Date.

Objectives

Objective of the product is to provide the investor with a specified entitlement according to predefined conditions. This product offers the investor a Coupon Rate regardless of the performance of the Underlyings during the lifetime.

Early Redemption on the specific Early Redemption Date:

On each Early Redemption Observation Date, the Issuer has the right, but not the obligation, to call the product for Early Redemption on the respective Early Redemption Date.

The investor will receive CHF 1'000.00 (100% of the Denomination) plus the Coupon Amount, if applicable, for the respective Coupon Payment Date. No further payments will be made.

Redemption possibilities on the Redemption Date:

- If a Barrier Event has NOT occurred, the Investor will receive the Denomination.
- If a Barrier Event has occurred and
 - (1) If the Final Fixing Level of the Underlying with the Worst Performance is below the respective Strike Level, the Investor will receive a round number (i.e. Conversion Ratio) of the Underlying with the Worst Performance per Product. Any potential fractional Conversion Ratio entitlements (Fractions of the Underlying) will be paid in cash, based on the Final Fixing Level.
 - (2) If the Final Fixing Level of the Underlying with the Worst Performance is at or above the respective Strike Level, the Investor will receive the Denomination.

A Barrier Event shall be deemed to occur if at any time on any exchange business day during the Barrier Observation Period the level of at least one of the Underlyings' prices has been traded at or below the respective Barrier Level.

The investor might incur a loss in case the sum of the value of the delivered Underlying on the Redemption Date, the Fractions of the Underlying and the coupon payment is below the purchase price of the product. Different from a direct investment in the Underlyings, the investor will not receive any dividend payments nor any further entitlements resulting from the Underlyings (e.g. voting rights). The investor will not benefit from any increase of the market price of the Underlyings above their respective Strike Levels.

4. What are the costs?

The person advising the investor on the product or selling this product to the investor may charge the investor other costs. If so, this person will provide the investor with information about these costs and how they affect the investor's investment.

Cost over time

The tables show the amounts that are taken from the investor's investment to cover different types of costs. These amounts depend on how much the investor invests, how long the investor holds the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year the investor would get back the amount that the investor invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.
- CHF 10'000 is invested

	If the investor exits after the recommended holding period
Total costs	CHF 80
Annual cost impact (*)	0.8% each year

(*) This illustrates how costs reduce the return of the investor each year over the holding period. For example it shows that if the investor exits at the recommended holding period the average return of the investor per year is projected to be 0.8% before costs and 0.0% after costs.

We may share part of the costs with the person selling the investor the product to cover the services it provides to the investor. It will inform the investor of the amount.

Composition of Costs

One-off costs upon entry or exit		If the investor exits after 1 year
Entry costs	0.8% of the amount the investor pays in when entering this investment. These costs are already included in the price the investor pays.	Up to CHF 80
Exit costs	Exit costs are stated as CHF 0 in the next column as they do not apply if the investor keeps the product until the recommended holding period.	CHF 0

5. How long should the investor hold it and can the investor take money out early?

Recommended holding period: 28/05/2025 (until Redemption Date)

The objective of the product is to provide the investor with the redemption profile described under "1. What is this product?" above. This only applies if the product is held until maturity.

There are no possibilities to take the investor's money out early other than to sell the product on the exchange where the product is listed or off-exchange.

Under normal market conditions, the price at which the investor may sell the product will depend on the market parameters prevailing at the time, which could put the invested amount at risk.

In unusual market situations, or in the event of technical faults/disruptions, a purchase and/or sale of the product can be temporarily hindered, or may not be possible at all.

6. How can the investor complain?

Any complaint regarding the person advising on, or selling, the product on the relevant website can be submitted directly to that person.

Any complaint regarding the product or the conduct of the Issuer of this product can be submitted to the following address: Swissquote Bank AG, Chemin de la Crétaux 33, 1196 Gland, Switzerland, structuredproducts@swissquote.ch, www.swissquote.com.

7. Other relevant information

Any additional documentation in relation to the product and in particular the final terms or the pricing supplement and the issuance and offering programme (including any supplements hereto) are published on the Issuer's website www.swissquote.com. In order to obtain more detailed information – and in particular details of the structure of and risks associated with an investment in the product – the investor should read these documents.

Furthermore, the PRIIP Manufacturer created the KID after having made certain assumptions and exercised certain discretion with respect to calculations of key figures and performance scenarios and is going to reassess and adapt its assumptions as it deems appropriate from time to time.
